Charge point operation

- In-house design resource
- Initial feasibility studies: the art of the possible
- Power requirement modelling inc. load shifting

- From fast AC to ultra-rapid DC chargers
- Trusted partnerships in place with top suppliers
- Hardware agnostic – we recommend the best solution for you

- Various back office and payment solutions – software agnostic
- Relationships in place with key suppliers
- Potential to white label products and introduce your own brand

- Workplace Charging Scheme (OZEV-accredited installer)
- Funding available through partner network
- Capex light options available

- Grid connections & power upgrades
- Trained operatives to perform complex high voltage works
- Longstanding relationships with DNOs and IDNOs

- 24/7/365 Operational Support & Maintenance
- Uptime guarantees with different SLAs to meet requirements
- Dedicated in-house inspection and test team

We specialise in complex solutions

Our expertise makes us the ideal long-term partner in an ever-moving landscape.

Public Transport

- Installation of ultra-rapid DC charging infrastructure at numerous locations
- Upgrading HV grid connections and reinforcement of power networks

Fleet Charging

- Supporting the electrification of large commercial fleets, across vehicle types and charging requirements
- Home charging schemes for return-to-home fleet

Public Charging Schemes

- Numerous schemes supported across the UK (PAYG, e-car sharing)
- Local authority partnerships in place to install and maintain 1 million UK street lights

EV Hubs

- Leveraging our technical expertise to deliver bespoke EV charging solutions for complex situations
- Licensed to operate on forecourts; our team is ATEX accredited

Some of our projects

We partner with household names to deliver projects that transform local communities.

Customer

Key facts

- Transformation of Caledonia Road bus station in Glasgow
- 18-month project; 162 chargers to be installed
- Phase 1 (11 dual DC rapid chargers) saw 22 additional buses on Glasgow's streets for COP26

- Enerveo engaged with Cornwall Council as a single service partner across a number of upgrades
- Installed 23 rapid and 22 fast EV charging points across the region
- Project resulted in cost savings of 54% across Cornwall Council's transport, waste & environment operations

- Deployment of London's largest zero-emission single deck bus fleet at Waterloo bus depot
- Intricate electrical infrastructure installed to support 48 charge points
- Project resulted in 700 tonne annual carbon reduction

- Part of a national framework agreement for ultra-low and zero emission vehicle charging infrastructure
- Framework utilised by Public Bodies inc. Local Authorities, Educational establishments etc

“The thing that impressed me the most was Enerveo's willingness to find a resolution to any issue that arose.

I trusted Enerveo to deliver what they promised within a tight timescale, and I was not disappointed.”

Richard Harrington
London's Director of EV Engineering
Go Ahead London

We take pride in supporting our customers to accelerate their journey towards Net Carbon Zero. Our broad service offering extends from EV charging solutions into the installation and maintenance of renewables and other Net Carbon Zero technologies. If we can support you on your journey, please get in touch.

Together, we can drive towards a better future. For all.
