

Infrastructure Solutions

ENERVED

Innovate

at every

opportunity.

About Us

Enerveo is one of the largest contracting businesses in the UK, offering a broad scope of services including mechanical, electrical, high voltage, electrical vehicle (EV) infrastructure installation, test and inspection services, as well as street lighting.

We deliver everything from straightforward solutions to highly complex energy infrastructure projects through an end-to-end approach, using innovation and collaboration to better our industry.

Our customers trust us to deliver the broadest range of mechanical and electrical engineering services. We harness our engineering experience and heritage gained over the years, to shape our future and provide the assurance needed when designing and building energy infrastructure.

The health and safety of our people, the infrastructure we deliver and the communities we serve is paramount. That's why we have built a culture where safety comes first, continually working towards reducing risks and protecting everyone involved throughout the lifecycle of a project and beyond.

Our project delivery is underpinned by our focus on rigorous safety processes and our unrivalled technical expertise. This enables us to deliver first class solutions. Our history of engineering excellence enables us to address strategic and 'street level' challenges, offering practical, safe and achievable services that are grounded in mechanical and electrical excellence.

Whether it's a complex M&E design and fitout, construction of a new energy centre, or certifying electrical compliance, our people care deeply about doing the right thing. It's a collective way of thinking and doing, which enables us to deliver on our promise of a better future for all.

Our every day is driven by our values.

Renew and build
for a better future

Enerveo, where
we are all welcome

Safety for all.
It's non-negotiable

Every day, quality
drives us forward

Together we
grow and prosper

Our Services

Electrical, Mechanical and Digital systems that provide energy efficient control and performance for buildings and infrastructure:

Our Experience

Mechanical

Our expertise has overseen the delivery of some of the most advanced mechanical schemes and sophisticated onsite generation systems in critical environments. Solving such complex challenges allows us to retain and sharpen our edge, and deliver the latest techniques, technologies and ways of working.

Whether working on a stand-alone project, as part of a framework, or as a wider M&E contractor, the unique way in which we are structured enables us to undertake both large and small schemes, in even the most challenging environments.

Electrical

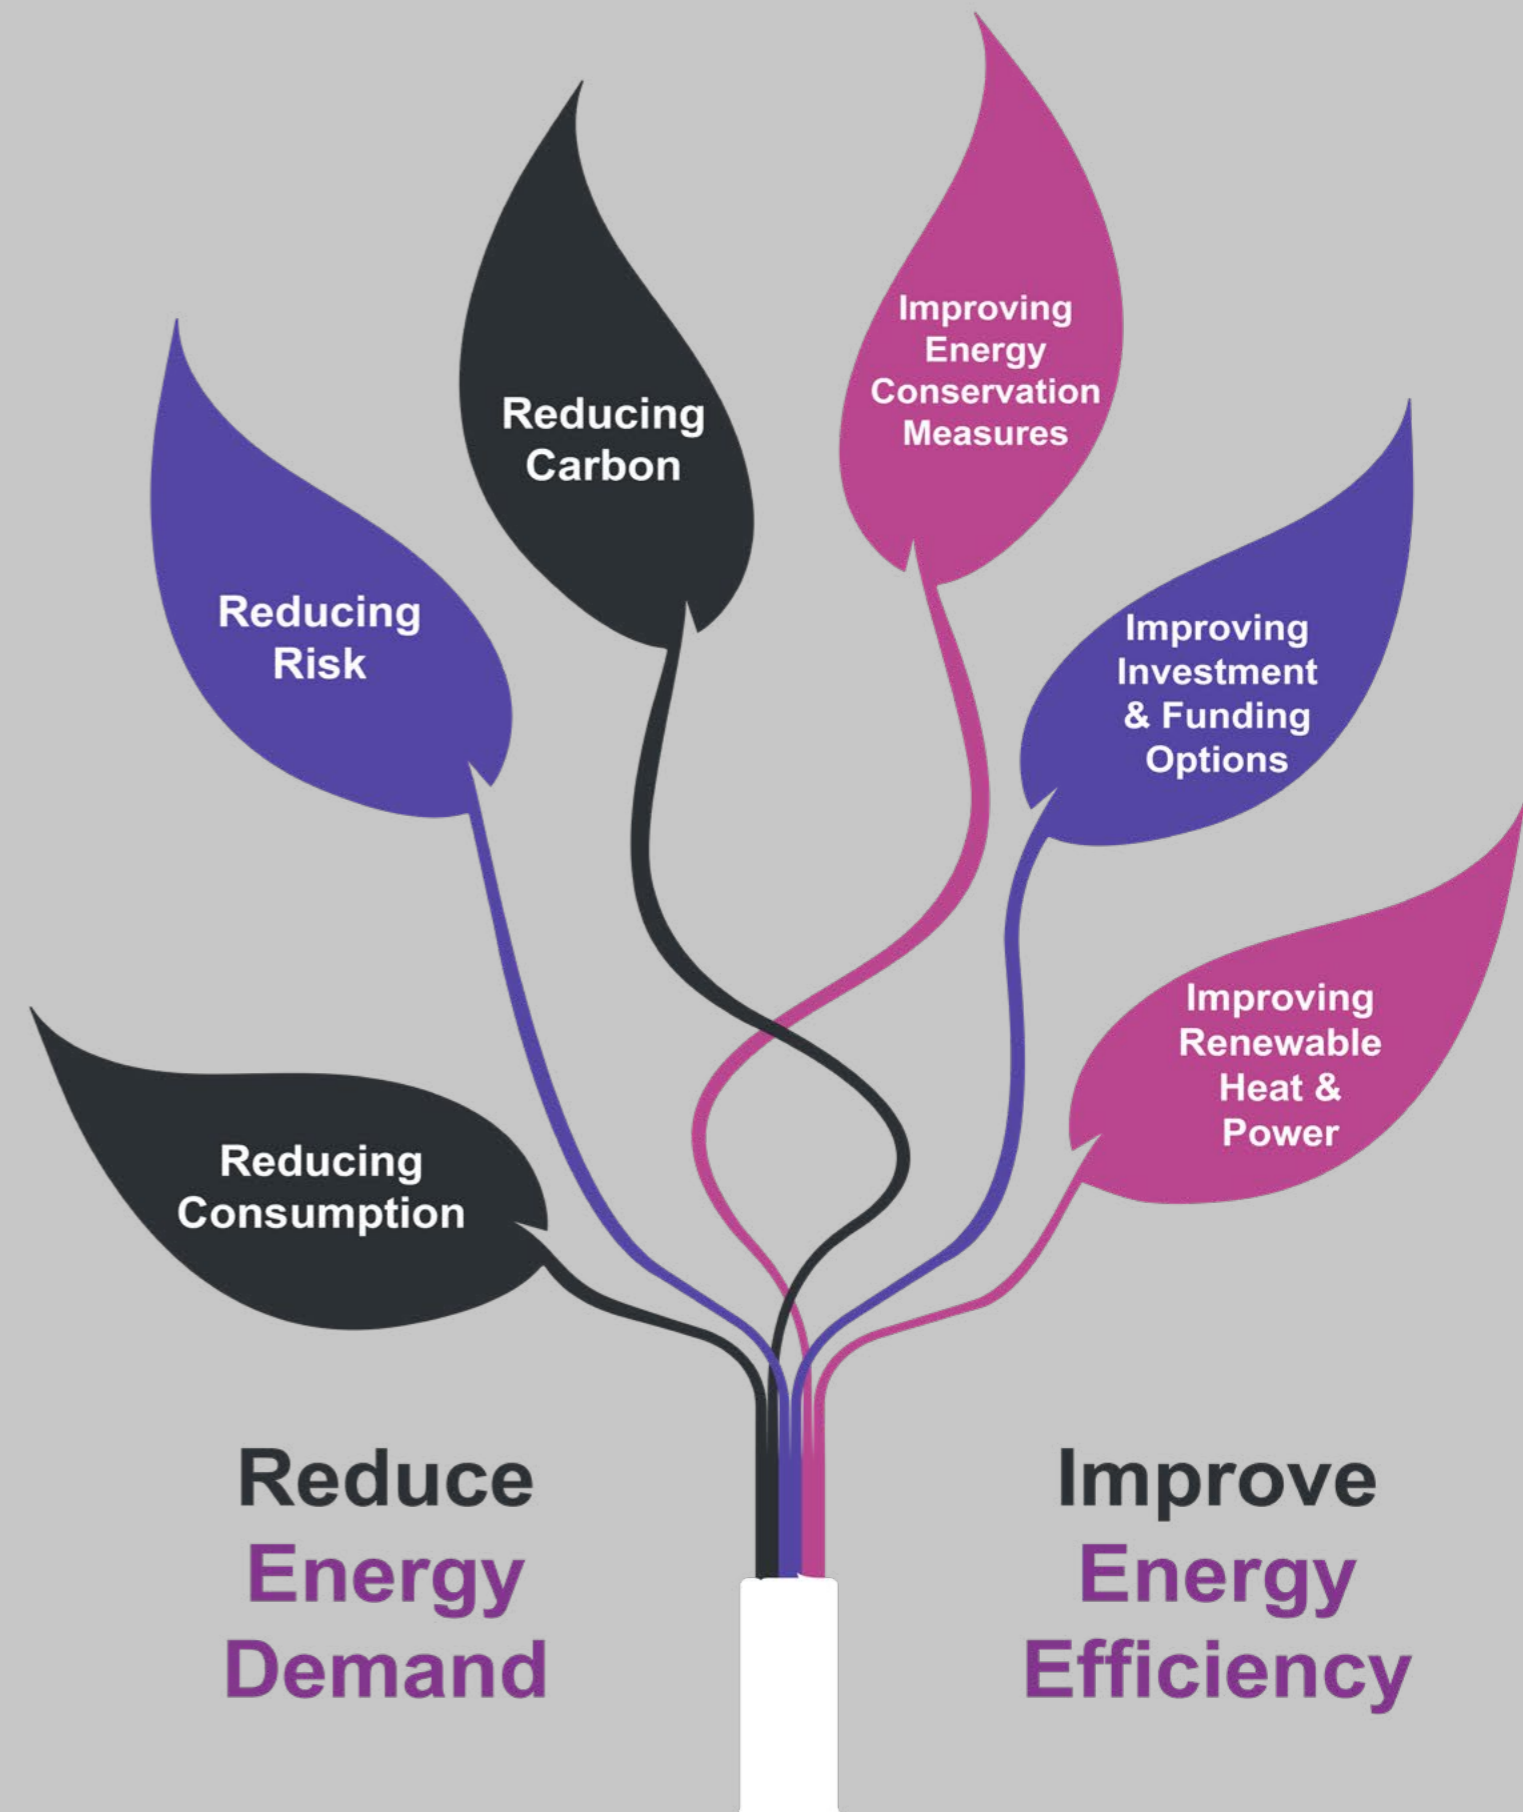

For over 25 years, Enerveo has led the electrical contracting market by developing a unique combination of technical expertise and professionalism, while taking an innovative approach to every project. From electrical design and build, to planned maintenance and compliance, we pride ourselves on delivering a full turnkey service and guaranteeing our customers receive the most effective solution for their needs.

Electrical Compliance

At Enerveo, we view electrical safety from a highly professional perspective. This means that our customers benefit from one of the industry's most comprehensive electrical compliance services. Our national team works hand-in-hand to guarantee our clients legally meet their fixed-wire obligations and that facilities continue to operate safely.

From undertaking Electrical Installation Condition Reports, PAT and fixed-wire testing, to emergency lighting, we take complete ownership. This results in our customers being able to focus on their core business, safe in the knowledge that their electrical systems are operating safely.

Spotlight on...

Westfield Shopping Centre

Client: Westfield Group
Value: £6M

Scope of works

For the Westfield Group, Enerveo provided a host of essential services:

- HV infrastructure
- Gas networks
- Fibre network
- Civil works
- LV cabling
- Safety, legal and compliance

With 15km of cabling, including a fibre network to allow remote control of the entire power system, Enerveo delivered 11kV across 24 substations, as well as also providing a local gas network.

The integrated design and construction approach enabled adaptations to evolving client requirements and incorporation of tenant modifications, while maintaining a fast-track programme.

Hinkley Point Accommodation

Client: Premier Modular Ltd
Value: £13.1M

Scope of work

Enerveo had full design responsibility for all M&E services, including:

- Electrical installation works
- Power supplies to mechanical equipment
- New lighting installations
- Data communications
- Emergency broadcast system
- Lightning protection
- Combined disabled alarm and refuge alarm
- Hot and cold-water services
- Above ground drainage
- Water treatment and commissioning
- New toilet installations
- Medical gas installations
- Air conditioning and heating installation
- Full catering facility design and installation
- BMS control system
- Testing and commissioning

Enerveo also prefabricated many of the services via an offsite fabrication specialist, which resulted in a shortened, more efficient, install programme both in the factory and on site.

Leeds General Infirmary

Client: Leeds Teaching Hospitals NHS Trust
Value: £2M

Scope of work

As part of the plan to build a state-of-the-art adults' hospital and a new purpose-built home for Leeds Children's Hospital at Leeds General Infirmary, Enerveo was tasked with the diversion and installation of new critical services in order to facilitate the demolition of existing buildings that will make way for the new hospitals.

An ongoing project, Enerveo has so far successfully completed the first step of the process – isolation and diversion of the main steam line, which has enabled safe demolition works of the current existing buildings to get underway. The Enerveo project team skilfully undertook the works during a planned weekend shutdown that was completed on time and with no loss of service or disruption to the hospital or patients.

"As Project Manager for the Demolition and Enabling Works at LGI, I have found Mark Lucciarini and the team to be professional, committed, reliable and easy to work with. They have adopted an open, collaborative approach and Mark's communication skills are excellent. Enerveo (previously SSE Contracting) engages fully with the technical team and works effectively with the specialist Estates team."

"Enerveo (previously SSE Contracting) has a proactive approach to the delivery of the works, problem solving and cost efficiency initiatives. The on-site team are supported by the Director and senior management team who are readily accessible to support the delivery of a challenging project."

Where we are

all welcome.

Our People

Our vision is to be an employer that attracts, develops and retains a sustainable pipeline of highly engaged and well-trained employees.

Our guiding principles help build our teams, cultivate careers and provide opportunities for everyone. We unlock potential in our people by giving them access to programmes that support their growth and build their careers.

We work in collaboration with our clients to create long-term value, whilst taking pride in representing our business and the communities where we work and live. We take the time to understand the challenges our clients face, providing a bespoke solution that meets our clients' needs. In addition, Enerveo boasts an experienced, nationwide team of electrical engineers.

We place a strong focus on pre-construction activities to ensure full delivery planning is in place before we arrive on site. We achieve this by facilitating and challenging procurement and build methodology decisions early in the process, to mitigate risk and avoid failure.

We are empowered to think differently, challenge the status quo, innovate at every opportunity and deliver projects with purpose.

Safety

The health and safety of our people, the infrastructure we deliver and the people and communities we serve is paramount. That's why we have built a culture where safety comes first and continually work towards reducing risks and protecting everyone involved throughout the lifecycle of a project and beyond.

It's a no-compromise approach to safety that is second nature throughout our business.

We put the safety of our people and the workplace environment first, making sure everyone gets home safe.

- ▶ We ensure the safety, quality and integrity of our customers' infrastructure
- ▶ It is our duty to uphold the highest standards and to deliver a world class service
- ▶ Our project delivery is underpinned by our focus on rigorous safety processes and our unrivalled technical expertise
- ▶ If it's not safe, we don't do it

Sustainability

Our teams are driven to innovate, renew and build for a better future. It enables us to meet those challenges, unlock shared value for both our business and society and help our customers advance towards a net-zero future.

- ▶ We work to accelerate society towards Net Zero
- ▶ Our approach enables us to power communities more efficiently and sustainably
- ▶ We are mindful of our critical role and honour the responsibility we have in doing so
- ▶ We harness our engineering experience and heritage gained over the years to shape our future
- ▶ We adopt an end-to-end approach to innovation and collaboration to better our industry
- ▶ We are forward facing. We act with pace and vigour
- ▶ We invest in innovation and technologies to create social impact
